# WIPEOUT

H O A G M E M O R I A L H O S P I T A L P R E S B Y T E R I A N

## COLORING BOOK

**Hi! Going to the beach is lots of fun,  
but it can also be dangerous.**

**To stay safe, follow these tips from  
Hoag Hospital's Project Wipeout®.**

**Learn to swim.  
If you don't know  
how, don't go  
in the water.**

**Always swim with a friend and stay near a lifeguard. They keep you safe.**

**Never dive head first into the water!  
The water isn't as deep as it looks.**

**And never dive off of piers,  
rock jetties or surfboards.**

**Stay away from the big waves  
that crash onto the shore.  
They can hurt you.**

**When bodyboarding  
or bodysurfing,  
keep your arms out  
in front and don't  
forget your fins and  
board leash.**

**Lifeguards are your friends.  
Ask them about dangerous  
water conditions. Can you find  
3 danger spots in this picture?**

**If caught in a rip current,  
swim parallel to the shore  
until you are out of the current.  
Then swim at an angle away  
from the current toward the shore.**

**If you see someone in trouble,  
tell the lifeguard right away.**

**Stay away from fire pits!  
Hot coals may be  
hidden under the sand,  
and you could get burned.**

**Remember to apply sunscreen  
(SPF 30 or greater) before going  
outdoors and again every two hours.  
Also, after playing in the water.**

**Have fun at the beach!**

## PROJECT WIPEOUT® SAFETY TIPS

By following these safety tips, you and your family can enjoy a fun and safe day at the beach.

- Learn to swim.
- Never swim alone, and always swim near a lifeguard.
- Ask the lifeguard about water conditions before you go in.
- Stay away from the big waves that crash onto the shore.
- Never dive head first into the waves. And never jump or dive into the water from a pier or rock jetty.
- Keep your arms out in front of you when bodyboarding or bodysurfing.
- If caught in a rip current, swim parallel to the shore until you are out of the current. Then swim at an angle away from the current toward the shore.
- If you are in trouble, call or wave for help. If you see someone else in trouble, tell the lifeguard right away.
- Stay away from fire pits! Hot coals may be hidden under the sand and you could get burned.
- Remember to apply sunscreen (SPF 30 or greater) before going outdoors and don't forget to reapply sunscreen every two hours or more frequently, especially if swimming.
